# **Paul Belton Elementary School Campus Needs Assessment 2015-2016**

Paul Belton Elementary School provides kindergarten, and open-enrollment pre-kindergarten for our three year and four year old students. Paul Belton also offers a PPCD program and a kindergarten resource class for students with special needs. The atmosphere is child-centered, safe and nurturing. Our highly-qualified staff is dedicated to the academic, social, and emotional needs of young children. Everything our students participate in is structured to give them the foundation of skills they need to be successful as they move on to their next step in education and eventually high school graduation.

Early childhood education continues to evolve as the demand for increased academic expectations continue rise. Therefore we continue to evaluate our programs as we continue to push the rigor even at the early childhood level. Borger ISD continues to keep up with national trends in education, embraces high-expectations and rigorous instruction. Our students in pre-kindergarten are busy taking those first steps in early literacy, early mathematics, social and emotional learning, and learning the norms of school. Our team of pre-kindergarten teachers provides rich, hands-on learning experiences to prepare them to transition into kindergarten. In kindergarten, children are met with quality literacy, math, and science programs. Students experience rich literature, writing, problem solving, and hands-on activities to build concepts in mathematics, science, and language arts. Woven throughout the curriculum are character development, physical development, music and art. We also provide a science lab, sensory lab and computer lab. Our teachers are masterful at creating engaging, energetic, rigorous, classrooms where students can achieve those high-expectations. Our students leave Paul Belton Elementary ready for first grade.

At the close of the 2014-2015 school year, our Site Based Decision-Making Committee collected data through multiple sources to assess the “pulse” of our campus. Sources included, but were not limited to: PEIMS data, enrollment records for all grade levels and sub groups, ECI projections, TAPR, Istation reports, results from kindergarten assessments and reading benchmarks, including our developed literacy assessments, attendance data, Raptor reports, student level reviews, teacher and parent interviews and surveys. As these sources were studied, we were able to identify

many strengths, and some areas of need.

For the 2015-2016 school year, Paul Belton will look for ways to strengthen collaboration from our teachers especially at the kindergarten grade level. We have been unable to have all kindergarten teachers on the same hallway due to room limitations and space. Our site base committee has come up with some changes that we can incorporate to bring all kindergarten teachers and pre-kindergarten teachers on the same hallway that could fulfill the need of collaboration as evidenced on the teacher surveys. Another project that we would like to address would be the need for updated playground structures and surfacing.

Parent and staff feedback shows that a large percentage of responders feel that the staff at Paul Belton is supportive and caring, that students are making good progress and being well prepared for their next steps in education, and that the overall climate of this campus is positive with a focus on high achievement. The parents also indicated they feel their child is safe while at school. Concerns that were noted included: a need for understanding the technology used at school and more variety, better communication needs, need for playground updates, continued safety supports including cameras.

As a campus it is our goal to align our effort with the overall District Improvement Plan. To that end we are working diligently as a campus to learn about and implement an Inclusion Plan for our special education students. As we increase our numbers transitioning into PPCD at three years old, and as the behavioral support needs increase, we are finding the need to be strategic in our placement of students within the master schedule. It is our goal to create a PPCD classroom that intentionally addresses the IEP's of students while providing the proper amount of support. When the number of our special education students transition into kindergarten with behavioral support needs and/or educational support needs increase, we notice the need to use an inclusion model rather than a self-contained resource room model to best meet these needs. Therefore, this need for supports and professional development for an inclusion model have been addressed in this needs assessment and ultimately the Campus Improvement Plan.
